

VENT Series

VENT-100 to VENT-315

VENT-355 and VENT-400

Range of in-line duct centrifugal fans, manufactured from high grade corrosion resistant pressed galvanised steel and supplied as standard with a pre-wired wiring junction box and a robust mounting foot. All model include an enclosed type, single-phase external rotor motor with factory matched backward curved non-stalling impeller.

(1) Models 355 and 400 are manufactured in sheet steel protected against corrosion by cathodolysis primer and black polyester paint finish.

Motors

100 – 315 models: Motors are IP44, class B insulation with ball bearings and safety thermal overload protection.

355 and 400 models: Motors are IP54, class F, with ball bearings and safety thermal overload protection.

Electrical supply:

Single phase 230V 50/60Hz.

Three phase 230/400V 50Hz (models 355 and 400). (See characteristics chart).

All models are speed controllable.

Additional Information

"L" version: High performance models.

"B" Version: Standard performance models for lower noise level requirements.

Impellers from 100 to 160 models are manufactured from injection moulded plastic.

Technical characteristics

Before installation check that the product electrical characteristics listed on the data plate label (Voltage, power, frequency etc) match those of the intended electrical supply.

Model	Voltage V/Hz	Speed (rpm)	Maximum absorbed power (W)	Maximum absorbed current (A)	Maximum airflow (m³/h)	Sound pressure level at 3m (dB(A))	Minimum ambient temperature (°C)	Maximum ambient temperature (°C)	Weight (kg)

Performance curves

- Q = Air volume in, m³/hr and m³/s.
- Ps = Static pressure in Pa.
- Dry air at 20°C and 760 mmHg.
- Performance data in accordance with ISO 5801 and AMCA 210-99 Standards.
